****Guidelines for Making a Bank Transfer****

1. Please double check that all the information is correct when you fill out the form for a bank transfer.
2. Be sure to make your transfer in **USD**
3. US Banks do not have IBAN numbers. The above information should be all you need to make the transfer. Make sure you do not enter any information in the IBAN category when you make the transfer.

4. For those outside the US, it is helpful to request to work with a bank representative who is familiar with transfers to US banks, as these transfers are different from European bank transfers.
5. Make sure the routing number and account number are in the correct place and are not switched.
6. If you have any questions or confusion, contact Karen at support@corfurettreat.com and send her a picture of your bank transfer form, so she can help you double check and ensure there are no mistakes before you send the transfer.
